How Long Can SPC Flooring Last. With proper care and maintenance, SPC flooring can last anywhere from 20 to 25 years, a testament to its durability. To prolong its lifespan, regular cleaning with a damp mop and mild detergent is recommended.

What are the benefits of spray foam insulation?

Spray foam insulation is always better. It usually costs 2 or 3 times as much as well. The r value is higher. It also doesn't pack down over time. In addition, having your home properly sprayed foamed can also extend the life on your AC and duct work.

What is the life expectancy of spray foam insulation?

80 years to 100 years

Spray foam insulation lasts for 80 years to 100 years, but closed-cell spray foam will last a little longer than open-cell spray foam. For many homeowners, this lifespan will extend beyond the entire time they own their house.

What is Onyx?

Onyx is a type of marble but it's mostly made up of calcite. Since onyx is a derivative of marble, it's a lot more translucent. Homeowners can get creative with the lighting. Also, onyx is quite unique, so no two pieces will be exactly alike. This is good news for homeowners who want to have a unique kitchen.
