# FOUNDATION REPAIR / HOUSE LEVELING UNDER THE HOUSE

EXCAVATING UNDER THE HOUSE

DRIVING PILES TO SUPPORT BEAMS

UNIFORM LIFT FROM BELOW

PILES INSTALLED FOUNDATION SUPPORTED

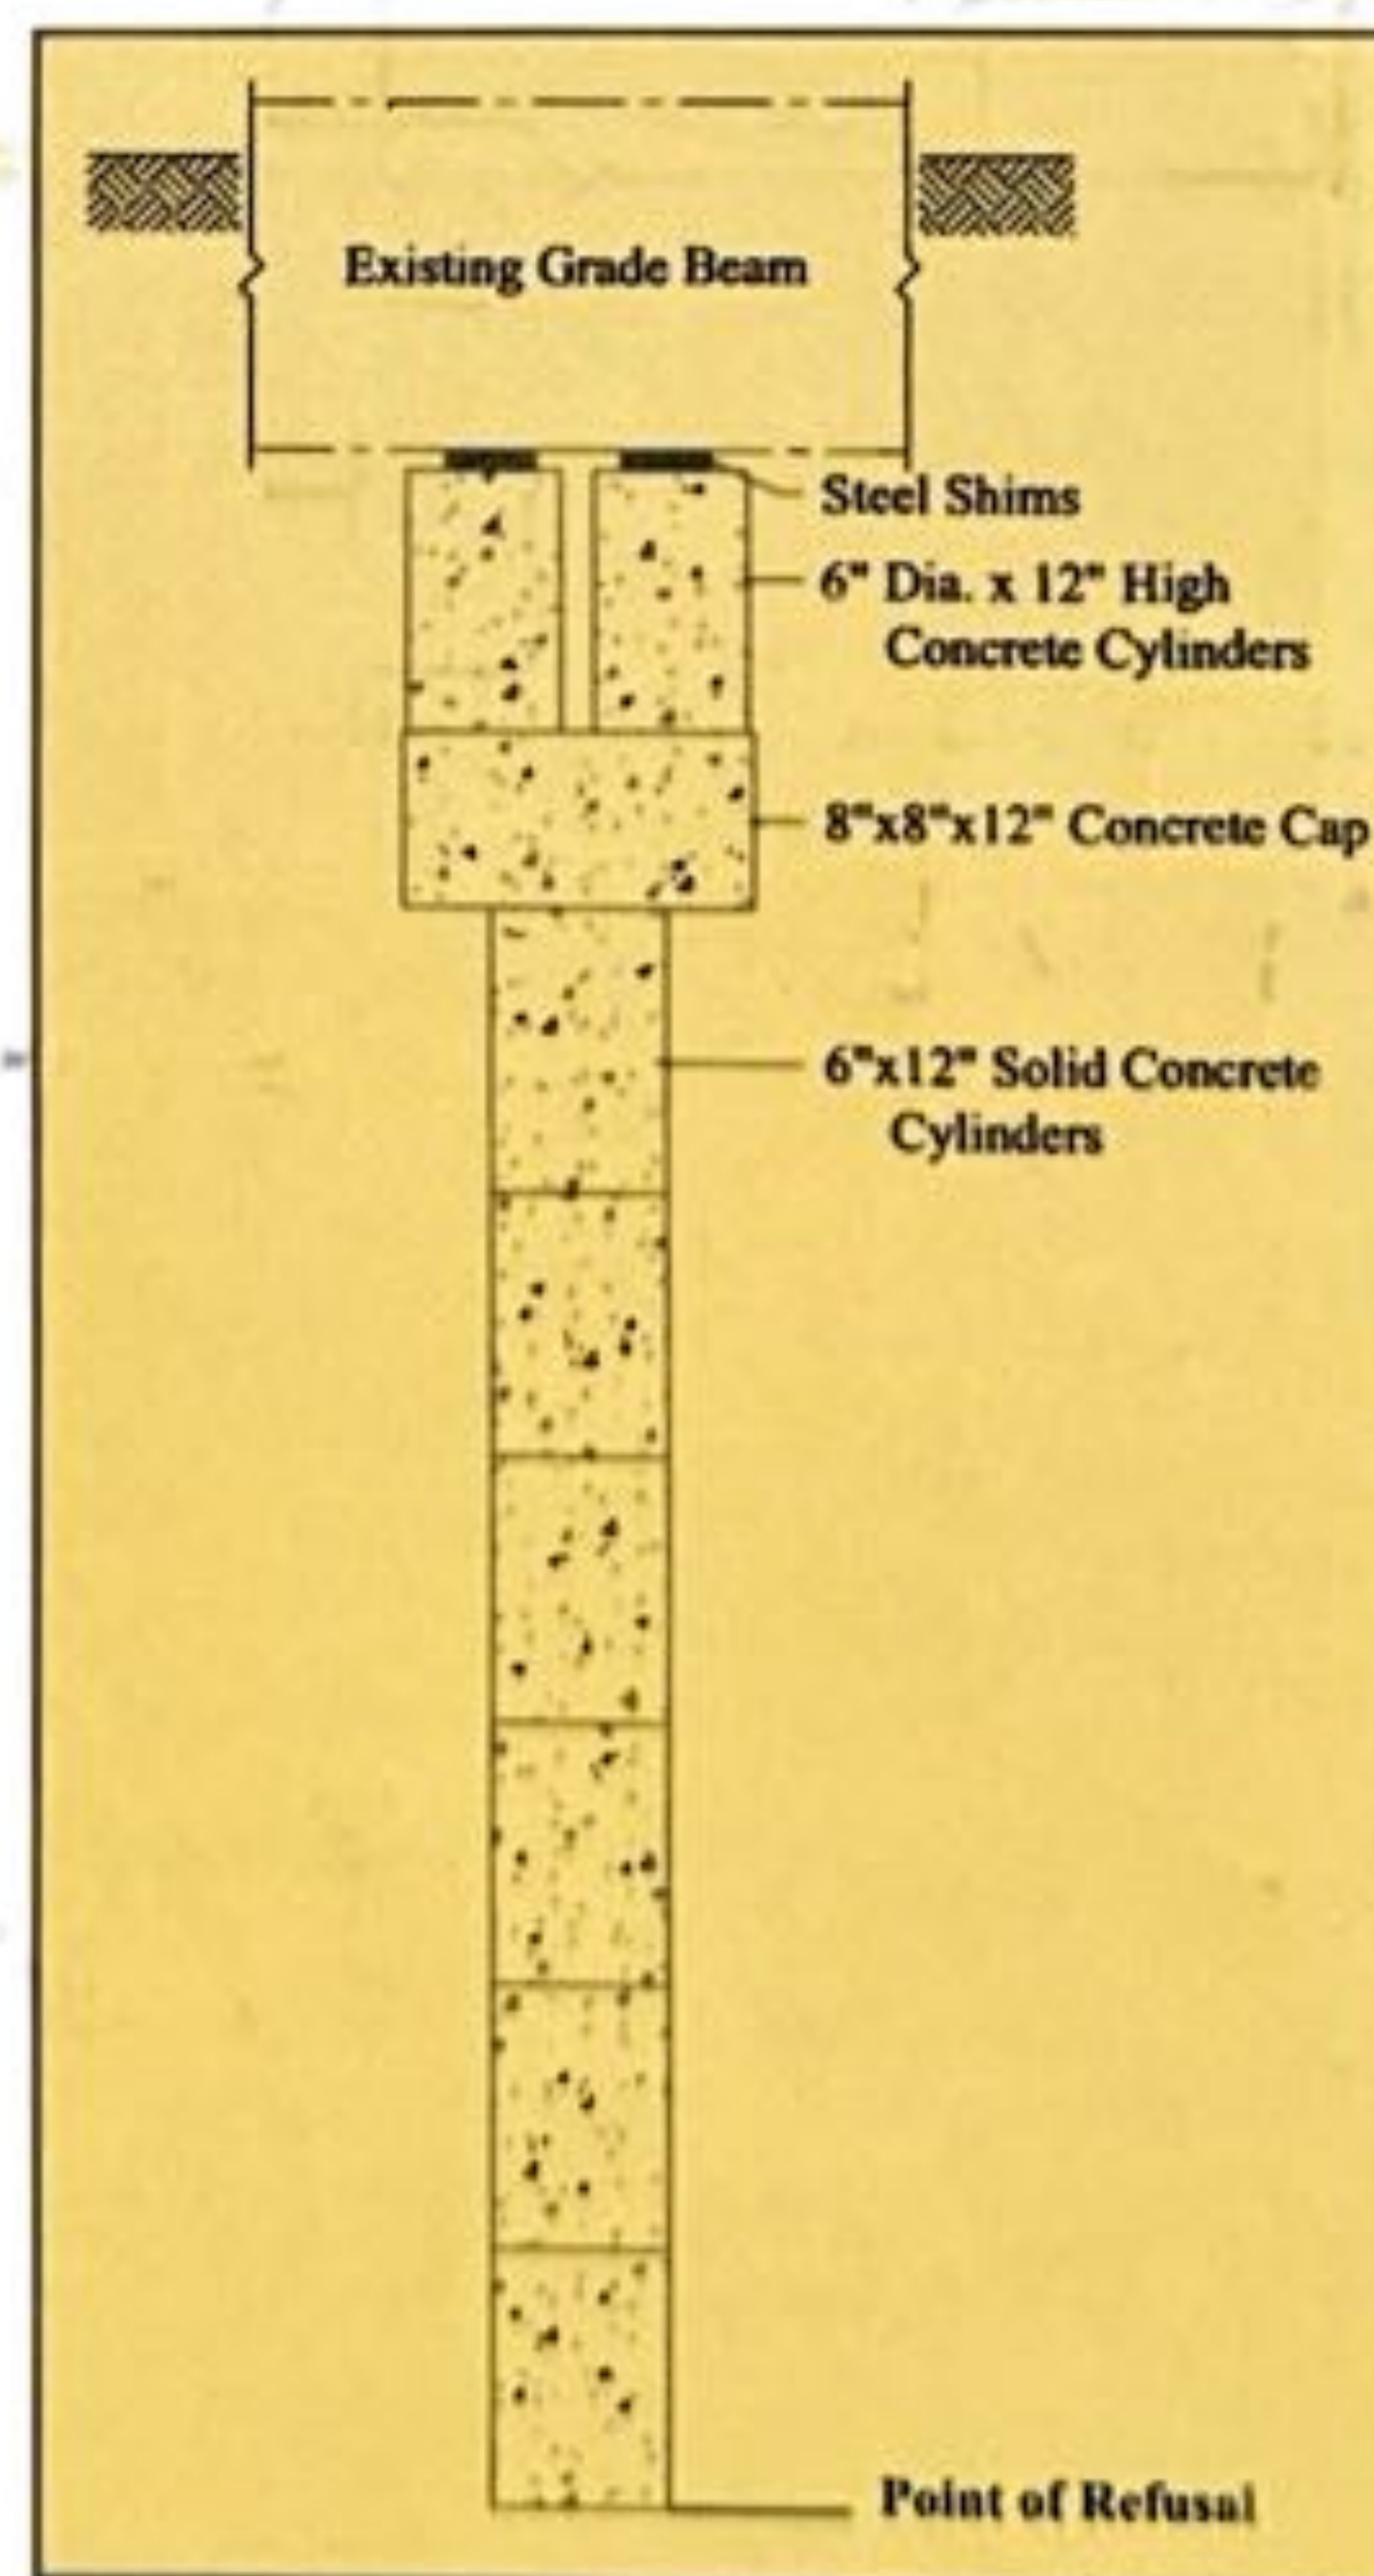

## REASONS FOR SETTLEMENT:

Seasonal drying and drought like conditions causes this expansive clay to shrink. This soil expands when there is too much rain.

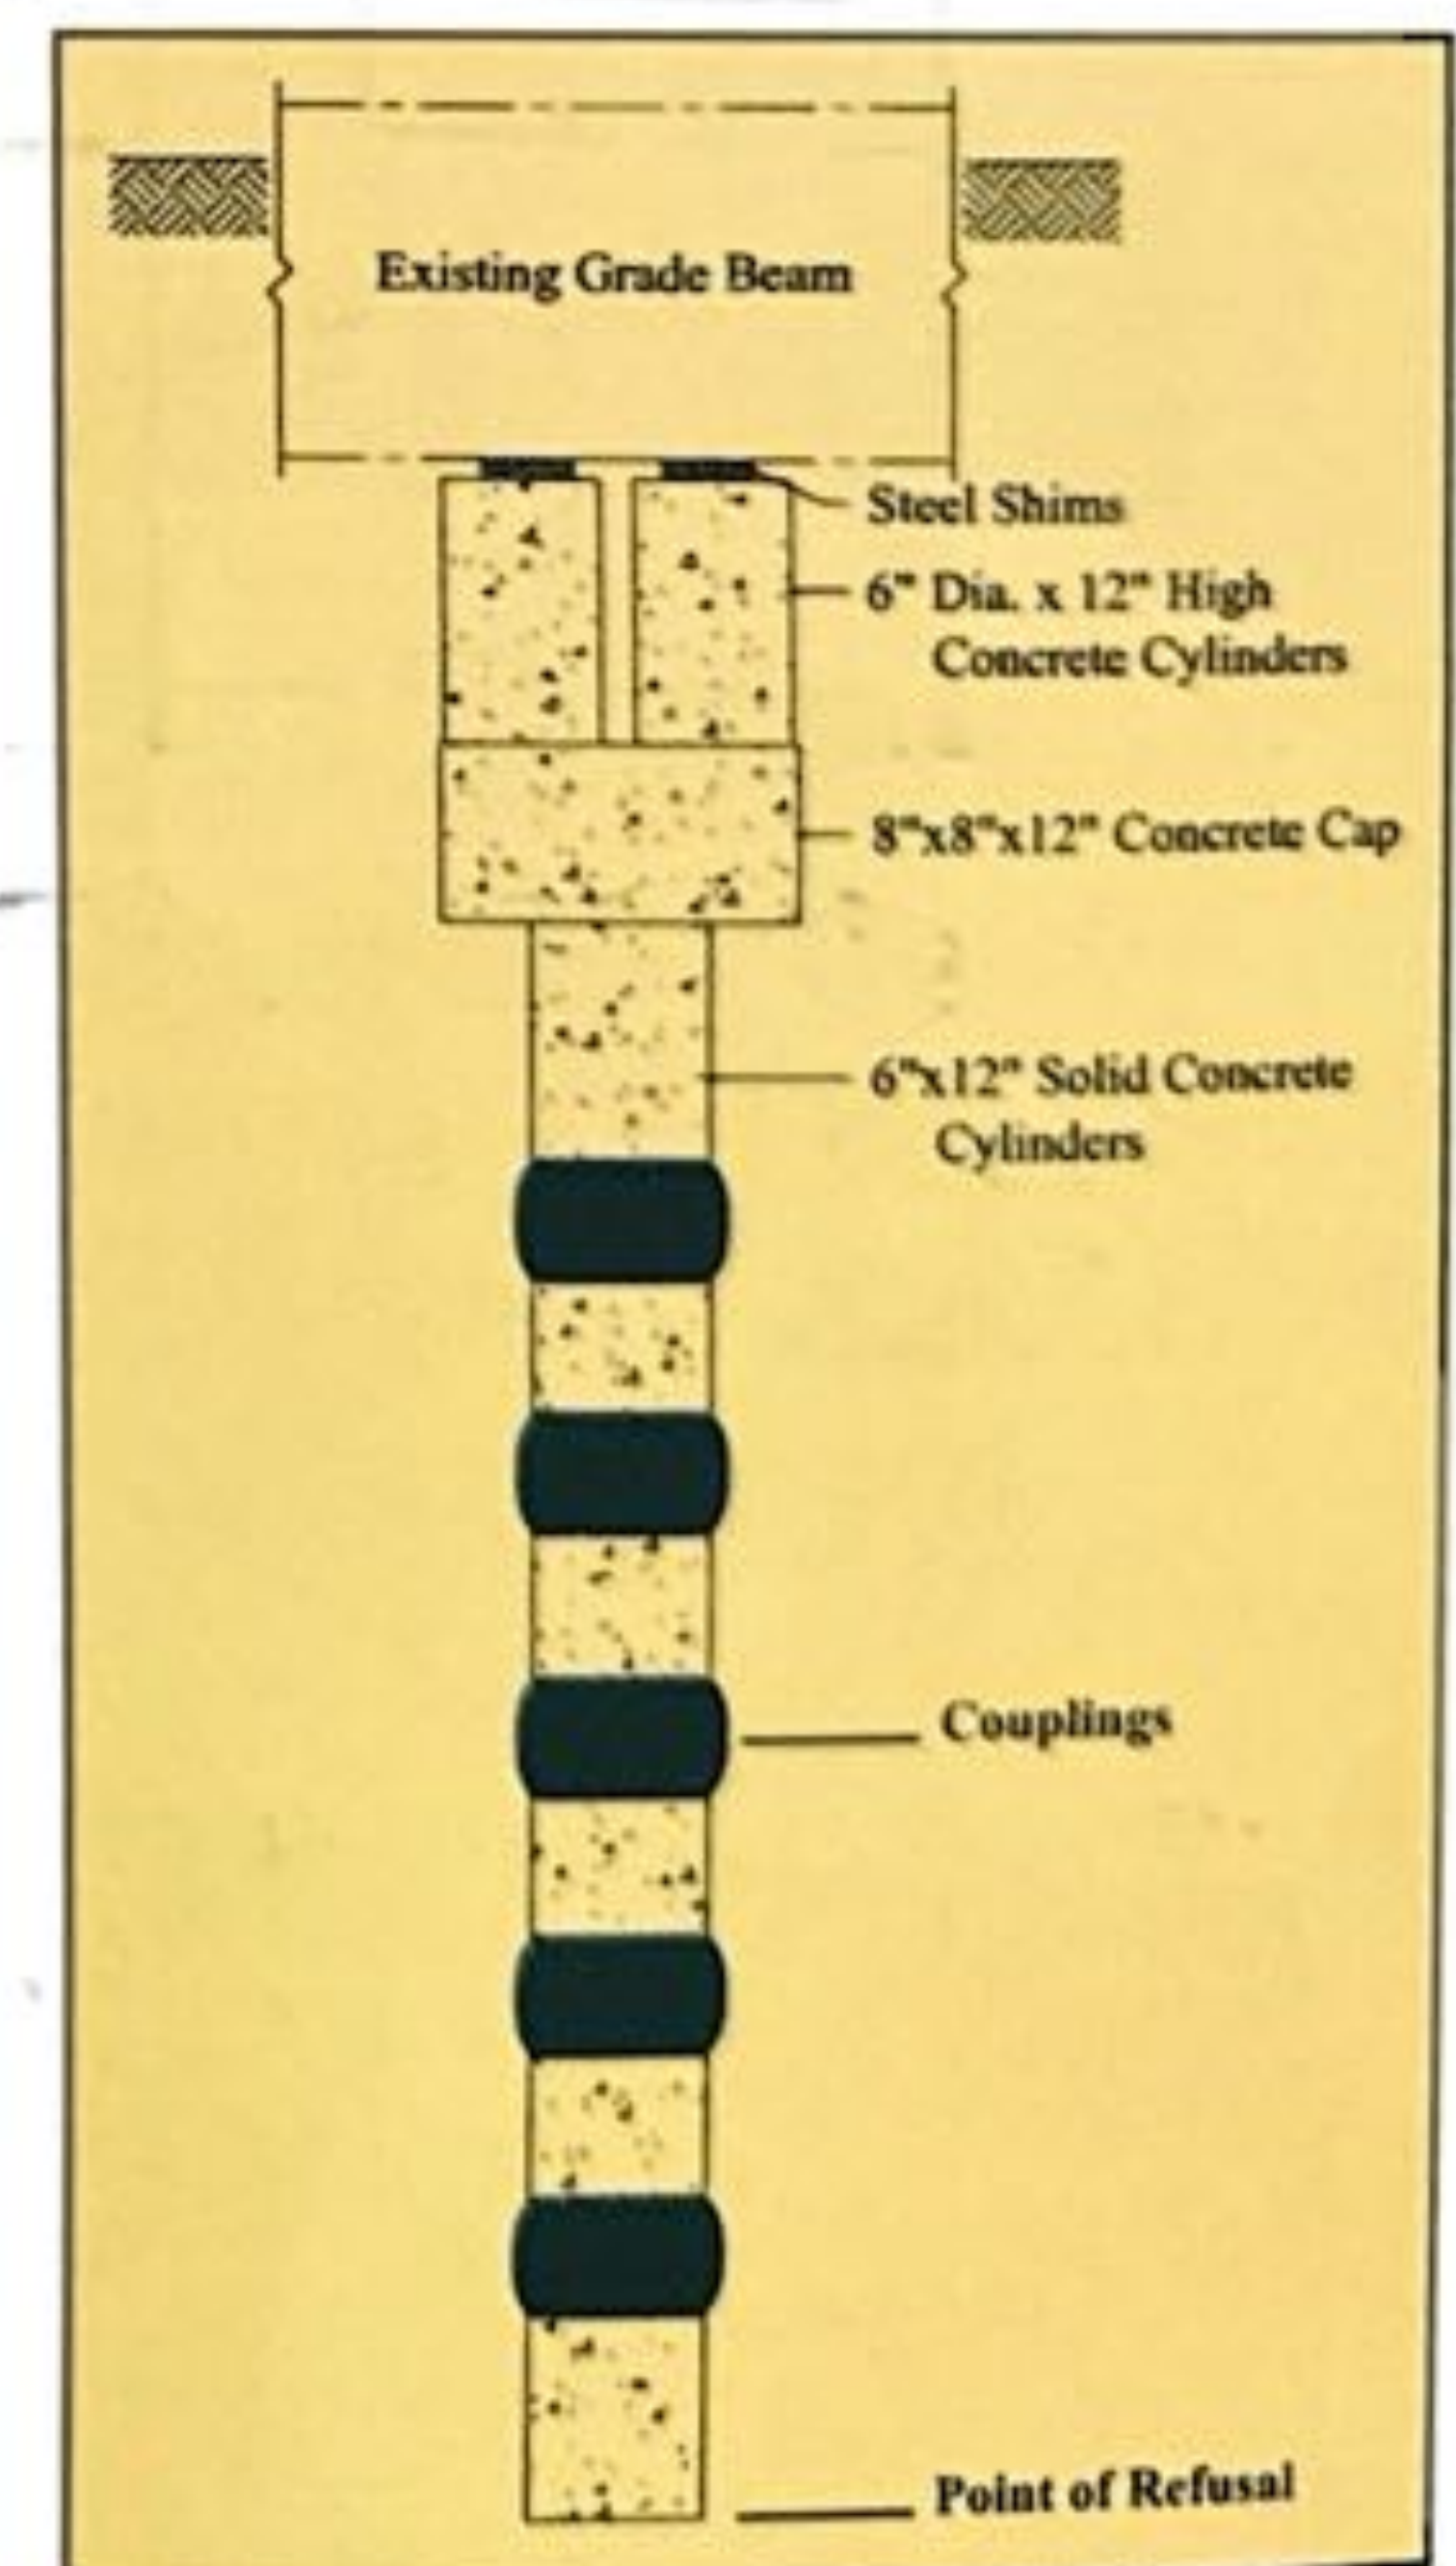

The shifting and moving of the ground below adds stress to the foundation which will eventually crack the slab.

Allied Foundation has (2) two outstanding piers to stabilize your foundation.

1. Driven Concrete Pier
2. Pile Guard Pier

Driven Concrete Pier

Pile Guard Pier

# SEWER LINE REROUTE *(RMP 39626)*

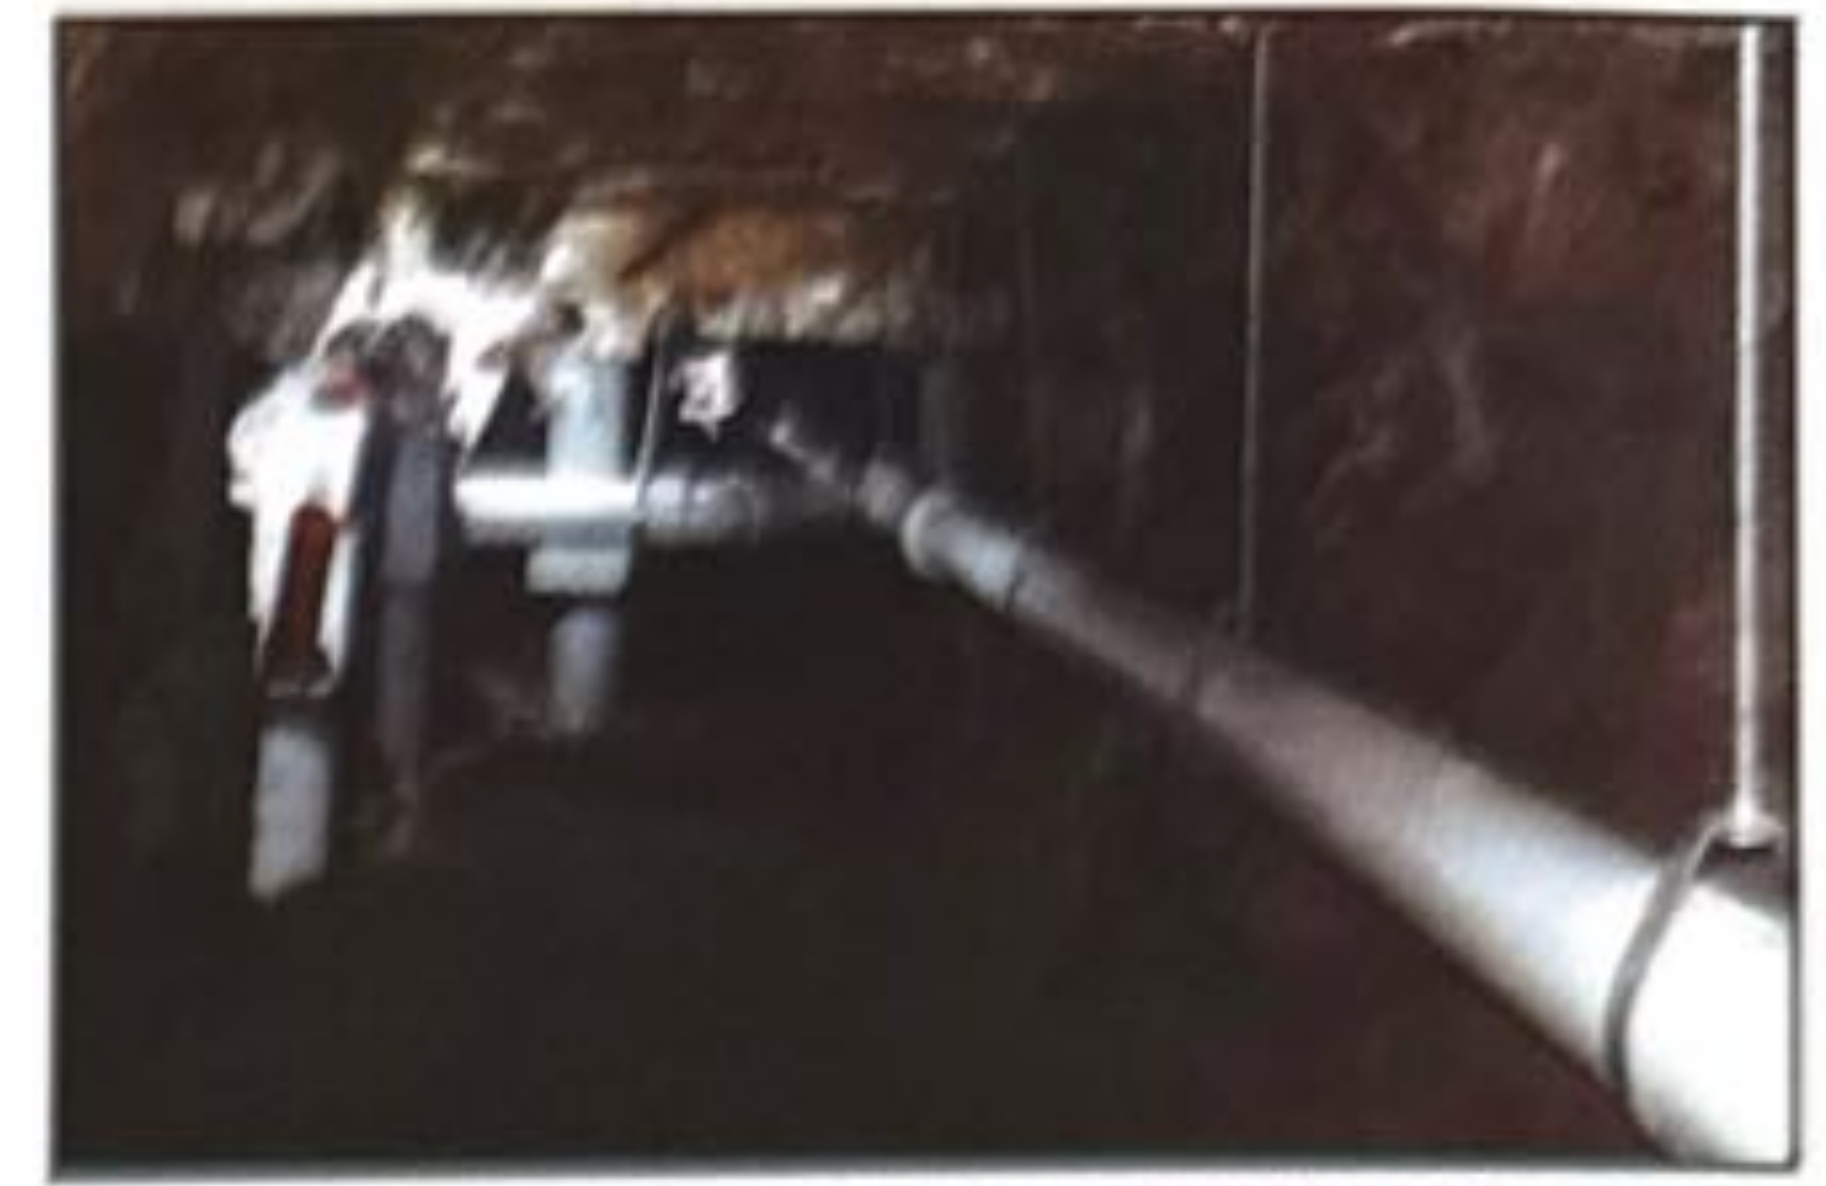

Cast Iron and ABS sewer lines crack, deteriorate and corrode under the foundation. We remove and replace it with PVC.

REMOVE & REPLACE CAST IRON WITH PVC

CAST IRON/ABS PIPES SEWER LINE FAILURE

PVC PIPES DO NOT DETERIORATE

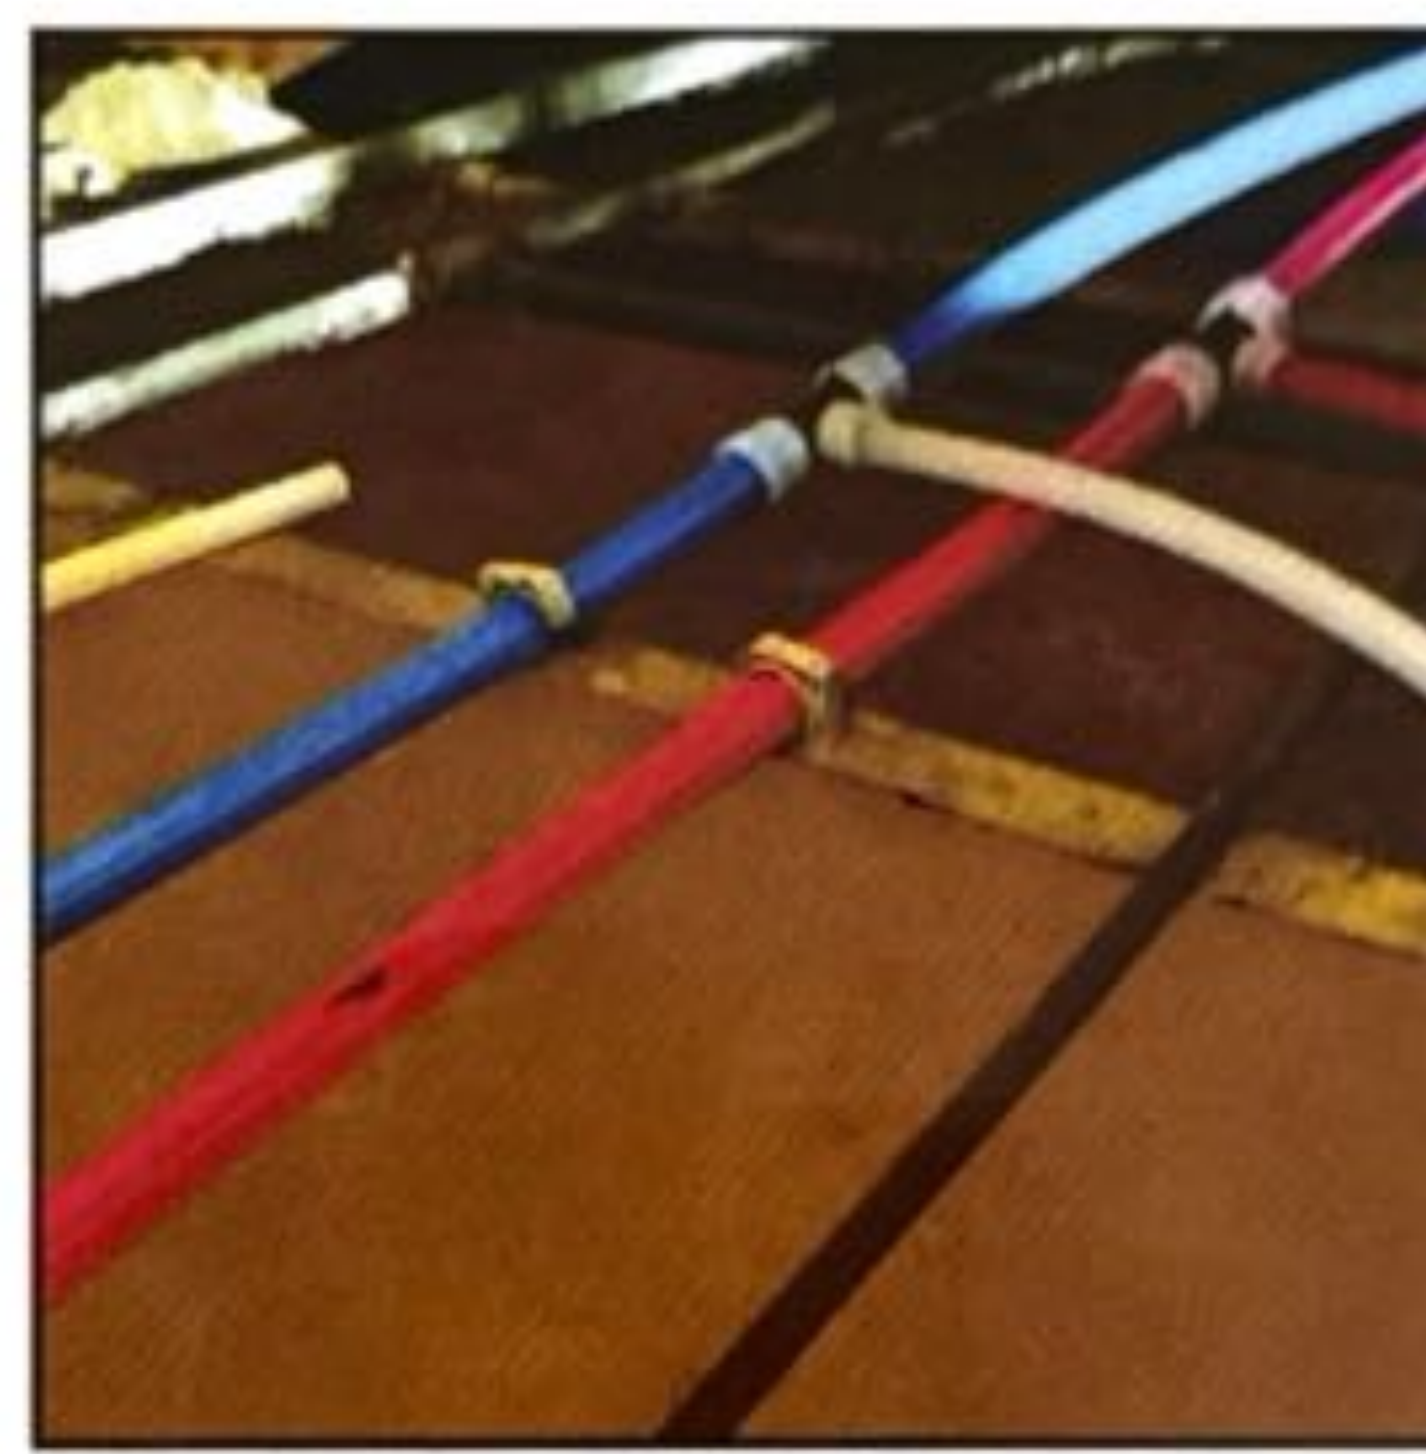

## WATER LINE REPIPE

Deteriorating pipes can leak and burst during a freeze. Expandable flex piping solves that problem.

**RUSTY WATER IN RUSTED PIPES**

LOW PRESSURE DAMAGING LEAKS

WASH & BATHE IN CLEAN WATER

PEX PIPES RESISTANT TO FREEZE & CORROSION

## ABOUT US

Over the past four decades, we have been providing our customers with quality work at a reasonable price. We stand out by standing behind our work.
