

# The Brookstone IS Collection

**Everything's Included®**  
in your new dream home.

Lennar has reimagined the home-buying experience by including the most desired new home features at no extra cost to you.

## Home Automation & Connectivity features NOW INCLUDED!

### Features

Lennar® Other Builders Used Home

### Connectivity Features

#### Infrastructure

- Wifi heat mapping (engineering)
- Legrand® On-Q® 42" RF Transparent Structured Media® Enclosure

<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

#### Features

- eero Pro 6 - mesh wifi system
- Ring Alarm Security Kit<sup>1</sup>, including:
  - Ring Alarm Base Station
  - Ring Alarm Keypad
  - Ring Alarm Motion Detector (1)
  - Ring Alarm Smoke & CO Listener (1)
  - Ring Alarm Window & Door Contact Sensor (3)
- Ring Video Doorbell Pro
- LiftMaster® myQ® Smart Garage Control
- Honeywell Home T10 Smart Thermostat
- Level Bolt - the invisible smart lock

<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Included Connectivity value**

**\$4,000**

1 Once your free 30-day trial is over from activation on your device, sign up for Ring Protect. Ring Protect is a comprehensive subscription service that lets you review, share and save every video and photo captured by your Ring device, opt-in to 24/7 professional monitoring with cellular backup for Ring Alarm, and more. To learn more about the Ring Protect plans and view pricing, visit <https://shop.ring.com/pages/protect-plans>. Ring Alarm professional monitoring service is available only within the U.S. (all 50 states, but not any U.S. territories) and in Canada (excluding Quebec). Ring does not own its professional monitoring center, but works with a leader in the industry to provide this service.

2 Every Lennar floor plan is designed using heat maps to verify wifi signal strength. If you are experiencing problems with the wifi in a Lennar home, please contact eero customer support at 866-356-1000 so that they can help resolve the issue and determine if a replacement or additional access point should be added at no charge. eero networks and devices cannot be controlled in the Ring App. Use the eero App to control and manage your home's eero network settings.

Lennar reserves the right to substitute with a device of equal or better quality. Select features may require additional fees and be provided by a third party. Lennar does not guarantee any equipment or services provided by Ring, eero, Level, myQ, or other third parties. The description of products is limited by the terms and conditions, limited warranty, and additional product information, available on <https://eero.com/shop>; <https://shop.ring.com>; <https://level.co>; <http://www.myq.net>; <https://www.honeywellhome.com/us/en/>; and <https://www.chamberlain.com/myq>. eero guarantee limited to one year and based on whether signal is consistently one bar as measured by the eero app, excluding causes outside of eero's reasonable control. Buyer responsible for downloading any apps required to use devices, engaging an outside service provider to provide internet connectivity to the home, and monitoring any alerts, and configuring all security features. This value is not intended to be used for code compliance.

## Standard Features of ENERGY STAR Certified New Homes and Apartments

Your ENERGY STAR certified new home or apartment has been designed, constructed, and independently verified to meet rigorous requirements for energy efficiency set by the U.S. Environmental Protection Agency (EPA), including:

### Thermal Enclosure System

A complete thermal enclosure system that includes comprehensive air sealing, quality-installed insulation, and high-performing windows to deliver improved comfort and lower utility bills.

Air Infiltration Test: 1350 CFM50 (4.35 ACH50)

### Primary Insulation Levels:

Ceiling: R-38      Floor: N/A  
Wall: R-13      Slab: R-0

### Primary Window Efficiency:

U-Value: 0.35      SHGC: 0.22

### Water Management System

A comprehensive water management system to protect roofs, walls, and foundations.

Flashing, a drainage plane, and site grading to move water from the roof to the ground and then away from the home or building.

Water-resistant materials on below-grade walls and underneath slabs to reduce the potential for water entering the home or building.

Management of moisture levels in building materials during construction.

### Heating, Cooling, and Ventilation System

A high-efficiency heating, cooling, and ventilation system that is designed and installed for optimal performance.

Total Duct Leakage: 73 CFM @ 25Pa (Post-Construction)      Duct Leakage to Outdoors: 51 CFM @ 25Pa (2.54 / 100 ft<sup>2</sup>)

Primary Heating (System Type • Fuel Type • Efficiency): Furnace • Natural Gas • 96 AFUE

Primary Cooling (System Type • Fuel Type • Efficiency): Air Conditioner • Electric • 16 SEER

Whole-House Ventilation Type (System Type): Supply Only

### Energy Efficient Lighting and Appliances

Energy efficient products to help reduce utility bills, while providing high-quality performance.

Energy Efficient Lighting: 100%

ENERGY STAR Certified Appliances and Fans:

Refrigerators: 1      Dishwashers: 1  
Ceiling Fans: 4      Exhaust Fans: 2

Primary Water Heater (System Type • Fuel Type • Efficiency): Residential Water Heater • Natural Gas • 0.62 Energy Factor

### About this certificate

The certificate provides a summary of the major energy efficiency and other construction features that contribute to this home or apartment earning the ENERGY STAR, as determined through independent inspection and verification performed by a trained professional. The Energy Rating Index or HERS Index for this home, if reported, is calculated in accordance with ANSI/RESNET/ICC Standard 301, with any exceptions

approved by EPA. Because the version of Standard 301 used to calculate this index may not align with the version referenced by code, this value is not intended to be used to demonstrate compliance with code. Note that when a home or apartment contains multiple performance levels for a particular feature (e.g., window efficiency or insulation levels), the predominant value is shown. Also, homes and apartments may be certified

to earn the ENERGY STAR using a sampling protocol, whereby one home or apartment is randomly selected from a set for representative inspections and testing. In such cases, the features found in each home or apartment within the set are intended to meet or exceed the values presented on this certificate. The actual values for your home or apartment may differ, but offer equivalent or better performance.

**LENNAR®**

## **Flo by Moen™ Smart Water Shutoff Quick Set-Up Guide**

**Secure. Conserve. Protect.**

# Flo by Moen™ Smart Water Shutoff Quick Set-Up Guide

Let's face it. Even homes built to the highest standards—like yours—can sometimes face unforeseen water events. Whether it's a little one leaving the bathroom faucet running, or an unexpected pipe burst, there's nothing worse than discovering water damage once it's too late.

The good news is that you have the Flo by Moen Smart Water Shutoff—meaning you're protected, 24/7. You've got total control of your water from anywhere at any time—and will receive alerts should issues arise. So, go explore your new neighborhood, take that vacation, and sleep peacefully knowing your home's water is secure with Flo by Moen.

## IMPORTANT:

The Smart Water Shutoff is a connected device. The device installed in your home has been unplugged/disabled to ensure water flow is uninterrupted as you move in and establish your Wi-Fi service.

Once Wi-Fi is established, locate your Smart Water Shutoff in your main water line (likely in the basement, garage or outside of the home). Plug it into the nearest outlet and proceed to Step 1 below.

**WARNING:** If connected to power without activating and connecting to a Wi-Fi network, you may experience frequent water shut-offs.

## STEP 1

### Download the App

Get the free Flo by Moen App from the Apple App Store or Google Play Store, or scan the QR code below.

## STEP 2

### Create Account

Follow the in-app instructions to register a new account.

## STEP 3

### Location Profile

- Once logged in to your account on the mobile app, tap "Add Location" from the dashboard.
- Follow the in-app instructions to complete your Location Profile.

## STEP 4

### Wi-Fi® Pairing

You've completed your Location Profile, it's time to pair your installed Flo by Moen Smart Water Shutoff to your app and home Wi-Fi.

- Plug the device into the nearest power outlet. (Note: Twist and turn the power cord until the second ring is completely in the device).

- Follow the in-app instructions to complete pairing your Flo by Moen Smart Water Shutoff to your app and home Wi-Fi.
- Looking at the Shutoff: With the VALVE light solid green, press and hold the Reset button for 5–10 seconds until the STATUS light begins to blink.
- You will then be asked to scan the QR code on your Smart Water Shutoff with your smartphone. Scan the QR code and follow the steps on the Flo by Moen app and complete the initial pairing instructions. Please note: If the Shutoff is installed on the main water line in a way that prevents you from being able to scan the QR code using your smartphone, please contact support@meetflo.com or call 1-844-MEET-FLO to receive a digital version of the QR code you can use to pair with.
- When you return to the Dashboard on your Flo by Moen App, you should see that your device is now in "Learning Mode." This means the device was successfully added to your account and is now ready to learn your home in order to protect it. Once the device goes out of learning mode, it will notify you and then begin to fully monitor and protect your home from water damage.

## STEP 5

### Ring App

When your Flo setup has been completed using the Flo by Moen app, follow these instructions to add your Flo by Moen Smart Water Valve to the Ring app:

- Open the Ring app.
- Tap Devices
- Tap Set up a Device
- Scroll down and tap Smart Water Valves.
- On the "Add Flo to your Shortcuts" screen, tap Begin Setup.
- Follow the steps to link your Amazon and Ring accounts.
- Follow the steps to link your Amazon and Flo by Moen accounts.
- When you finish this step, you'll have a new Flo tile on your Ring app dashboard. Using this tile, you can see your device status and be able to turn the valve on and off.

## STEP 6

### Get Started

Now that you're moved in, it's time for the Smart Water Shutoff to learn your home's habits. Over the next 7–10 days, the Learning Mode feature of the system will get to know what water use is normal for your home, so it can alert you to unusual activity that might indicate a leak or other water event.

While the system is learning, it's a great time to explore the many other features of the Flo by Moen App. Track your water usage by fixture, practice turning the water on and off, and consider setting some conservation goals.

## Learning Mode

During the 7-10 day period after installing your Smart Water Shutoff, your system will be in Learning Mode as it begins learning your home's water habits. While in this mode, your system will have limited functionality, but you can still track your home's water usage, view your home's water pressure, flow rate, and even turn on and off your water remotely.

**Note: During Learning Mode, you will not be receiving alerts from the system and your home will not be protected by automatic shutoff.**

- This 7-10 day learning period is a great time to familiarize yourself with Flo by Moen's User Portal and Mobile App.
- Once out of Learning Mode, your Smart Water Shutoff will automatically switch you over to Home Mode.
- In Home Mode, your Shutoff will be actively monitoring and protecting your home from potential water damage. Once in Home Mode, your Shutoff will begin to send you alerts as it notices irregularities in your home's water usage, pressure, and flow rate.

Any questions? Reach out to us at [support@meetflo.com](mailto:support@meetflo.com) or 844-MEETFLO.

## System Modes

Your Smart Water Shutoff can be set to three different modes, based on expected water usage:

**Home Mode** is the default mode for your Shutoff. You will receive an alert if the device detects an irregularity with your home water's pressure, temperature, or flow. If there's a critical issue, your device may turn off your water for you.

Choose **Away Mode** when you know you will not be home for an extended period of time, like a weekend away or a vacation. Away Mode adds additional protection to the home by learning what is normal for your home when the inhabitants are not present, and in the event of a potentially dangerous condition, the system may take quicker precautionary action by shutting off the water. It is important to note that your Shutoff will not turn off your water, however, if it detects inactive water usage, such as an ice maker or irrigation.

Choose **Sleep Mode** for expected, irregular water usage, such as a pool, washing the cars or hosting house guests. The Shutoff will not send you alerts or automatically turn off your water while you sleep. It is important to think of your system's Sleep Mode as a 'Do Not Disturb' option.

## Health Tests

Health Tests allow the Shutoff to check for leaks anywhere in your home. Your device will perform automatic daily Health Tests to make sure your home is constantly protected. You are also able to run a manual Health Test anytime by accessing the Control Panel in your Flo by Moen Mobile App. Every day, the Flo by Moen Smart Water Shutoff runs a Health Test on your home's plumbing. Like a security guard for your pipes, the nightly Health Test patrols every inch of your home's plumbing looking for leaks, monitoring pressure, and detecting anomalies, all while you sleep soundly.

### How the Health Test Works

Health Tests run during hours of low water usage—usually while you are sleeping. During the Health Test, the valve will close to monitor the stability of the water pressure within the pipes downstream of the Smart Water Shutoff. Below is a list of possible outcomes.

**Pass:** If there is very little to no pressure change, the test will pass.

**Fail:** If there is a gradual pressure change (a leak is detected), the Health Test will fail.

**Incomplete:** If the water pressure drops quickly (water is in use), the Health Test is interrupted and will not complete.

### The Results

If your plumbing passes its Health Tests, that's great! If your home fails a test, you'll want to find out why. To learn about troubleshooting leaks and failed Health Tests, visit [moen.com/flo](http://moen.com/flo).

# Flo by Moen™ FAQ

## Alerts

If your Smart Water Shutoff detects unusual water usage, you'll receive an alert. Alerts can be critical in nature, warnings, or simply system notifications. They can be sent via push notification, text, email, or via phone calls from Flo Support. You can access your alerts via your Flo by Moen App or User Portal. To access Alerts from your Flo by Moen App or User Portal, go to the Alert Notifications menu, or click on a pending alert from your Dashboard.

### Locating a Leak

If your Shutoff detects a small drip, you'll need to investigate. This could be a running toilet, a leaky faucet, or a small hole in a pipe.

### Critical Alerts

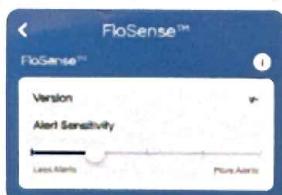

If your Shutoff detects water usage that far surpasses your normal behavior, you'll receive a critical alert, and your Shutoff will turn off your water. The source of the alert could be a burst pipe, a faucet left on, or an abnormally long shower.

*If you don't immediately know the reason for your critical alert, it's best to investigate quickly to avoid potential water damage.*

## FloSense™

FloSense 2.0 is our proprietary, feedback-enhanced AI. With FloSense, your Smart Water Shutoff is more accurate than ever.

Your home is unique. So are your water usage habits. The more you interact with your alerts, the more intelligent your Smart Water Shutoff will be. So make sure that each time you receive an alert from your Flo by Moen App, you correctly identify whether the source of the issue was intentional, accidental, or a leak. If you take a longer-than-usual shower and get an alert, make sure to let your app know so that it can learn from your experience. Likewise, if your Smart Water Shutoff detects a leak in your plumbing, make sure to identify it as such when you receive an alert.

### Sensitivity Slider

The Sensitivity Slider allows to adjust the level of your Shutoff's sensitivity to water events. Rather than putting your Shutoff in Sleep Mode, you can decrease its sensitivity by sliding the bar to the left to receive less alerts. Slide the bar to the right to increase sensitivity and precision.

To access the Sensitivity Slider in your Flo by Moen App, go to Settings, tap on a location under Locations, tap on the Shutoff device, then tap on FloSense under Advanced Features.

With FloSense 2.0, you have the ability to customize and train the algorithm to better protect your home. Your feedback allows FloSense to learn more about you and your water habits. In short, the more you interact, the smarter your Smart Water Shutoff will be!

## Smart Home Integrations

Your Flo by Moen Smart Water Shutoff can do more than just monitor your water usage and detect leaks. It's also capable of connecting to smart products across the home to allow you even more control.

### Google Assistant

Using Google Assistant on your Google Home device, you can ask about your home's water usage over a specified time frame, and about all of your pending alerts.

Say "Ok Google, talk to Flo Device" to start the conversation.

### Amazon Alexa

Amazon Alexa provides Flo by Moen users with a way to access information such as water usage & pending alerts.

Say "Alexa, talk to Flo" to start the conversation.

### Ring

Flo by Moen integrates with Ring for whole-home security monitoring and protection.
