

Custom Built Cabinets and Woodwork

The following items are custom “built-in” cabinets and woodwork that add value to the home. (“as-built” shop drawings are available for each item)

1. Livingroom Architectural Woodwork Feature Wall (9’ Tall by 21’ Long)
This wall is made with 2 different veneers. Main columns and headers are Quartered Plain Makore. The in-fill veneer is a Pomelle cut Sapele (in the Mahogany family of veneers) This wall features a “hidden door” to the Primary Suite. The base cabinets have touch latch doors with mirror and glass shelves above.
2. Level 2 Den/Game room has built-in bookshelves along the exterior windows. The bookcases continue to the north wall where it transitions to a desk with lower and upper cabinets with down lighting. These cabinets are plastic laminate clad, then painted gray to match design
3. Utility Room Built-in Cabinets – 7’ tall by wall to wall long – Plastic Laminate clad w/ white melamine interiors. Cabinets include a custom vacuum cleaner stand, Rod & Shelf, 4 large drawers, and a large printer shelf.
4. Oversized Garage with 2 elevations of Built-in Cabinets (overall size of Garage is 21’-6” wide, and 30’-6” deep). All garage cabinets are Plastic Laminate clad w/white melamine interiors.
 - South wall cabinets are floor to ceiling, 20’-1” in length
 - West wall cabinets are also floor to ceiling, 15’-1” in length, and are 3’-0” deep w/ pegboard backs
