

FASTLANE PRO SWIM SYSTEM

<https://www.endlesspools.com/products/fastlane-series/fastlane-swim>

The pool is equipped with a Fastlane Pro counter-current swim system by Endless Pools, a premium upgrade that transforms the backyard into a private aquatic training and recreation environment. The system produces a powerful, smooth current with dozens of adjustable speeds, allowing swimmers to train continuously in place without the need for a large lap pool.

With the integrated WiFi control module, the system connects to the Endless Pools mobile app, enabling you to set pace, control the current, and create fully customized swim workouts or interval training sessions directly from your phone or tablet.

Whether used for triathlon training, low-impact exercise, water aerobics, or creating a relaxing “lazy river” effect for family and guests, this feature adds both fitness capability and resort-style enjoyment to the pool.
