NOTE: Rates are dependent on market conditions and can fluctuate daily. Payments and savings depend on the buydown program chosen. These buydowns are covered entirely by JVM Lending. If buyers refinance before the buydown period ends, remaining funds are applied to their loan principal. Buyers who use this program remain eligible for the JVM Certified Free-fi. Loan is subject to approval, including income limits and credit score minimums. The rate remains fixed and can never increase above the starting rate amount after the buydown period ends. Loan scenario assumes first-time homebuyer, 30-year loan term, 20% down payment, and the cost of 1 point.

When will rates fall?

There are no guarantees, but many of the macroeconomic experts we closely follow predict that rates may fall soon.

So, buying in a higher-rate environment like today can be an advantage because there is far less competition, and you will likely be able to refi into a lower rate afterwards.

We also have numerous tools to help you lower your rate and payment if you buy in a higher-interest environment.

For information in regard to any of this, we encourage you to reach out to one of our experts at JVM Lending.
