

Top 5 Things I Love About My Home 28045 Woodland Bend Way

1. The grand entrance and soaring ceilings

The entryway and main living area have beautiful 20-foot ceilings that make the home feel open, bright, and impressive from the moment you walk in.

2. The natural light and greenbelt views

The home has tons of natural light, with large windows looking out toward the greenbelt and mature trees. It creates a peaceful, private, and relaxing feel.

3. The spacious primary suite

The primary bathroom is one of my favorite features, with a large shower, a 6-foot soaking tub that is actually comfortable to use, and a generous primary closet that connects directly to the laundry room.

4. The whole-home generator

The whole-home generator provides peace of mind year-round, whether during cold winter weather, storms, power outages, or hot Texas summers.

5. The open and functional kitchen

The kitchen is open, welcoming, and practical, with great functional storage, including excellent storage space under the island.
