

## Top 5 Things I Love About My Home 28045 Woodland Bend Way

### 1. The grand entrance and soaring ceilings

The entryway and main living area have beautiful 20-foot ceilings that make the home feel open, bright, and impressive from the moment you walk in.

### 2. The natural light and greenbelt views

The home has tons of natural light, with large windows looking out toward the greenbelt and mature trees. It creates a peaceful, private, and relaxing feel.

### 3. The spacious primary suite

The primary bathroom is one of my favorite features, with a large shower, a 6-foot soaking tub that is actually comfortable to use, and a generous primary closet that connects directly to the laundry room.

### 4. The whole-home generator

The whole-home generator provides peace of mind year-round, whether during cold winter weather, storms, power outages, or hot Texas summers.

### 5. The open and functional kitchen

The kitchen is open, welcoming, and practical, with great functional storage, including excellent storage space under the island.
