VALUE WINDOWS & DOORS FULL LIFETIME WARRANTY

Lifetime Warranty

At Value Windows & Doors, we are proud of the quality and workmanship of our windows and doors and are pleased to offer you the following Full Lifetime Warranty. We warrant our products to be free from defects in material or workmanship that significantly impair their proper operation for the lifetime of your home as long as you own it.

Coverage:

The lifetime coverage of this warranty applies to original owners of single-family homes and owners of single-family homes who purchase Value Windows and Doors for remodeling or replacement. This warranty is to the original purchaser for as long as they own and occupy their single family home. In the event the original homeowner transfers ownership of the home, this warranty may be transferred to the new owner for up to (10) ten years from the original date of purchase. Any warranty claims will require proof of purchase and of continuous ownership. Color Coating warranted for (15) fifteen years from date of purchase.

*NOTE: The warranty does not cover windows and doors that are sold for the following use: commercial buildings, multifamily housing or any type of new construction installation in tract housing. Product used in these types of installations will be warranted for ten (10) years from the original purchase date of the product.

Material and Components:

Value Windows & Doors warrants that the vinyl sash and frame members will be free from defects such as cracking, peeling, flaking, or blistering. Screens are warranted against defects in material for a period of one (1) year. Replacement screens will be delivered to the nearest Value Windows & Doors dealer/distributor.

Purchase Date: _____

Sales Order Number: _____

Glass: GS Series windows and doors are covered by our full glass breakage protection warranty. *Galaxy, Imperial, Luxury* models are **not** warrantied against glass breakage.

Limitations:

Every effort is made to ensure that your new Value Windows & Doors remain trouble free year after year. Of course, some items are beyond Value Windows & Doors' control and are not covered by this warranty. This warranty does not include:

- Component failure due to improper installation, application or use
- Small scratches, marks, slight glass curvature or other minor imperfections in the glass or vinyl
- Failures due to product modifications or window shading device
- Water infiltration caused anything other than manufacturing defects
- Normal wear and tear which includes natural weathering of exterior finishes including Color Finishes
- Chemical burns / yellowing due to improper use of non-approved improper harsh cleaning products
- Corrosion in highly corrosive environments
- Damage caused by "Acts of God"
- Incidental or consequential damage

Remedy:

Value Windows and Doors will, at its sole discretion, repair or replace free of charge, including parts and labor, any window or door proven to be defective in material or workmanship during the applicable warranty period, within a 75 mile radius of 91010.

Value Windows & Doors
Manufacturer of High Quality Windows & Doors

Lifetime Warranty Valid On **Value** Products Installed After January 1st, 2013

Simple, routine care and maintenance will keep your windows and doors looking and working great. With proper care, your windows and doors will continue to operate at their best. Value's warranty (see Value's website at www.valuewindowsdoors.com) does not cover damage or defects related to a failure to follow the care and maintenance instructions.

Proper Glass Care

Proper care of your window and door glass is important. Any of the **"DO NOT"** actions listed below can damage the glass surface or destroy the insulating glass seal and void the warranty.

DO NOT use a razor blades, sharp objects, abrasive pads or putty knife to clean the glass surfaces.

DO NOT use petroleum-based products or Acid/Caustic chemicals on your glass.

DO NOT use a high-pressure spray nozzle when rinsing your glass after washing.

Clean glass with a mild dish soap and water. Rinse completely with clean water and wipe dry with a soft cloth to avoid water spots. Avoid washing glass in direct sunlight for best results.

- Clean screens by first removing, then washing on a clean, flat surface with a mild soap and water solution using a soft brush. Rinse, dry and reinstall.
- Check all window sashes for smooth and regular operation. Increase interior home ventilation and air exchange devices if needed.
- Use restroom exhaust fans, especially when showering.
- Open windows and doors when possible to allow interior moisture to escape.

Vinyl Surfaces

Use only use mild soap and water to clean the vinyl surfaces. Using petroleum-based products or Acid/Caustic chemicals on the vinyl can strip and harm the surfaces. This may also cause increased wear, doing so will void the warranty.

DO NOT use petroleum-based products or Acid/Caustic chemicals on vinyl surfaces.

Color Finishes

As with all painted finishes, natural weathering will occur over extended periods of time. Proper care of color surfaces is important in maintaining the luster and color of the finish.

- Use a soft wet brush or absorbent cloth to carefully remove debris stuck to the painted finish.
- Periodically wash color finishes using warm water, and a mild detergent on a soft absorbent cloth.
- Never use solvents or solvent based cleaners of any kind on colored finishes.
- **Never** use a dry cloth or hard bristle brush to clean colored finishes.

Basic Maintenance

Lubricate the moving parts of window and door hardware if not operating smoothly.

Use only **spray silicone** based products to lubricate moving parts, being careful not to apply excessive amounts. Wipe up any drips or spills. In salt-air environments, monthly cleaning and lubrication may be necessary to preserve function. Inspect weather stripping on operable windows and doors to be sure it seals evenly when closed.

- Make certain that the track area clean and clear. Frequent vacuuming will clear any accumulated dirt and dust.
- Adjust sliding door rollers for proper height clearances. Door rollers are adjusted with a screwdriver through access holes in either the end or side of the sliding panel, located near the bottom of the panel.
- Adjust rolling screen doors to slide smoothly. Use a screwdriver, in all four corners, to make adjustments.
- Check on the sliding door lock strike placement if you adjust the door rollers. Adjustment is made by loosening screw fasteners, moving strike plate and tightening. Re-check for proper lock operation.

Drainage Systems

Vinyl Windows and doors use a simple drainage system or 'weep' holes designed in the frame itself. These water drainage pathways must be kept clean and clear of any obstructions to operate effectively. It's normal for water to accumulate in the sill or track area during a period of wind-driven rain. The weep system is designed to allow the water to drain to the outside as water builds up, or outside wind pressure subsides. Clogged weep holes may prevent excess water from draining. Over time standing water can damage your window or door and lead to structural damage from mold, mildew and wood rot if water enters your wall cavities.

- Keep all sill or track surfaces clean of dirt and debris.
- Make sure that exterior weep holes are clear of any debris, stucco, sand or other obstructions.
- Use a small, soft brush (such as an old toothbrush) to clear openings.

Regularly inspect the exterior perimeter of your window and door frames for any cracks, or cracks in the adjacent siding material that can cause moisture to penetrate.

The use of the following chemical cleaners will damage the vinyl window surfaces and void the warranty.

Lacquer thinner, acetone, mineral spirits, Gasoline, harsh chemicals such as bleach, ammonia, commercial cleaners and degreasers, Formula 409, Simple Green, abrasives cleaners eg. Ajax, Comet
