Features Love Most

The very best thing about our house is the neighborhood. We love the sidewalks and tree-lined streets with the alleys at the rear of the home. The paved trails all around The Woodlands are wonderful and even better than the neighborhood are the neighbors themselves. We all know and help each other creating a real caring community.

Another favorite feature about the house is the freestanding clawfoot tub in the primary suite. It has the perfect slant for a lovely comfortable soak. The showers have great water pressure as well!

With the kitchen being the heart of a home, we love the generous pantry. You go in and make a left and there you are. We have all our seasonal decorations on the top shelf. We also enjoy the coffee bar and designated location for the trash and recycling bins.

The charming gas fireplace (with remote) creates a cozy corner for family gatherings and the perfect place for hanging Christmas stockings. Other features we appreciate are the wooden rungs on the staircase, plantation shutters throughout the entire house on all the windows, a large Trex patio for outdoor entertaining (with natural gas grill) and no carpet on the first floor. We are fortunate too that we have fewer backyard trees than most which allows for a nicer backyard with grass.

The whole house is very comfortable and has been the perfect home for creating lifetime family memories for the last 22 years.
