

a note from the seller...

We bought this home because our family needed space to grow, and it delivered on every level. From the moment we moved in, we made it our own. We added the pool and transformed the backyard into the kind of outdoor space that makes staying home feel like a vacation. The Jellyfish lighting gives the exterior a warmth and character that changes the entire feel of the home after dark. Inside, smart locks, smart lighting, and a fully connected home make everyday life just a little more effortless. And the open floor plan with upgraded soft-close cabinetry and new tile flooring throughout ties it all together beautifully.

But what we will miss most is not something we built. It is the neighborhood itself. Quiet streets, great neighbors, five pools, a lazy river, splash pads, and parks that our kids have taken full advantage of every single week. The new elementary school nearby was a bonus we did not even anticipate when we bought, and it has been a wonderful addition to the community.

We are moving because our family is growing again and we need to be closer to work. It is a practical decision, but not an easy one. This home has been exactly what we needed during a wonderful chapter of our lives, and we are proud of every improvement we made to it.

Whoever comes next is getting a home that has been genuinely loved and cared for. We hope it brings your family as much joy as it brought ours.

The Wharton Family
